

## Young Investigator Award / Best oral Award

No	Presenting Author	Country	Title	Affiliations
5	Junji Umeno	Japan	A functional variant of SLC26A3 in association with ulcerative colitis down regulates SLC26A3 expression	Department of Medicine and Clinical Science, Graduate School of Medical Sciences, Kyushu University
93	Taku Kobayashi	Japan	NFIL3 deficient mice develop IL-12/23 driven spontaneous colitis	IBD center, Kitasato University Kitasato Institute Hospital
29	Takahiko Toyonaga	Japan	Fecal lipocalin2 reflects colonic inflammation in murine colitis model: A possible role of measuring fecal lipocalin2 as a biomarker of IBD	Department of Gastroenterology & Hepatology, Kansai Medical University
46	Yusuke Honzawa	Japan	IL-17A-induced HSP47 involves in collagen production in intestinal fibrosis of Crohn's disease	Department of Gastroenterology and Hepatology, Graduate School of Medicine, Kyoto University
114	Hiromitsu Ban	Japan	The ATP-cassette binding protein 4 (ABCC4) / multidrug-resistance protein 4 (MRP4) polymorphism is a new factor accounting for thiopurine sensitivity in Japanese patients with inflammatory bowel disease	Division of Gastroenterology, Shiga University of Medical Science
174	Shinichiro Shinzaki	Japan	Lectin-based immunoassay for "Agalactosyl IgG" as the biomarker for Crohn's disease	Department of Gastroenterology and Hepatology, Osaka University Graduate School of Medicine

## Best Poster Award

No	Presenting Author	Country	Title	Affiliations
2	Ryuichi Okamoto	Japan	Hes1 promotes IL-22-mediated antimicrobial response through enhancement of STAT3-dependent transcription in human intestinal epithelial cells	Department of Gastroenterology and Hepatology, Tokyo Medical and Dental University
148	Chien-Chih Tung	Taiwan	Increasing incidence, prevalence and higher mortality rate of inflammatory bowel diseases between 1998 and 2008: A population-based nationwide register study in Taiwan	Department of Internal Medicine, West Garden Hospital, Taipei, Taiwan
36	Fumihito Hirai	Japan	Efficacy of endoscopic balloon dilation for small bowel strictures in patients with Crohn's disease: A nationwide, multi-center, open-label, prospective cohort study	Department of Gastroenterology, Fukuoka University Chikushi Hospital
71	Shinta Mizuno	Japan	CCR9+ plasmacytoid dendritic cells in the small intestine suppress development of intestinal inflammation in mice	Department of Gastroenterology and Hepatology, Keio University School of Medicine
117	KEIICHIRO SAIGUSA	Japan	Colitogenic Th17 cells may help development of ROR $\gamma$ t-independent classical Th1 cells	Division of Gastroenterology and Hepatology, Department of Internal Medicine, Keio University School of Medicine
1	Go Ito	Japan	Lineage-specific expression of bestrophin genes in normal and inflamed human intestine: implications for ulcerative colitis.	Department of Gastroenterology and Hepatology Tokyo Medical and Dental University
56	Seong-Joon Koh	Korea	Fexofenadine inhibits NF- $\kappa$ B signaling and ER stress in intestinal epithelial cells, and ameliorates experimental colitis	Department of Internal Medicine, Seoul National University Boramae Hospital, Seoul National University College of Medicine, Seoul, Korea.
74	I-Lun / Shih	Taiwan	MR enterography in Crohn's disease: the power of evaluating extraluminal involvement.	Department of Medical Imaging, National Taiwan University Hospital and National Taiwan University College of Medicine, Taipei, Taiwan.
129	Eun-Ju Chung	Korea	Combination therapy with Metformin and VSL#3 attenuates tumor growth in Western-style Diet Induced Colitic Cancer Model	1Health Screening & Promotion Center, 2Department of Gastroenterology, University of Ulsan College of Medicine, Asan Medical Center and 3Asan Institute for Life Sciences,
151	Hiroyuki Isshiki	JAPAN	Mesenchymal Stem Cells Partially Cancel Azoxymethane-Induced Tumor Initiation	Department of Gastroenterology, Rheumatology and Clinical Immunology, Sapporo Medical University

## Travel Award

No	Presenting Author	Country	Title	Affiliations
106	Othman Alharbi	Saudi Arabia	Clinical epidemiology and phenotypic characteristics of Ulcerative Colitis in Saudi Arabia	Internal Medicine, Gastroendoscopy unit, King Khalid University Hospital.
19	Chang Mo Moon	Korea	Clinical features at the time of diagnosis and predictive factors of various clinical outcomes in Korean patients with Crohn's disease: a KASID multicenter cohort study	Department of Internal Medicine, Kangbuk Samsung Hospital, Sungkyunkwan University School of Medicine, Seoul, Republic of Korea
126	Sang Hyoung Park	Korea	Clinical Features and Long-Term Prognosis of Crohn's Disease in Korea: An update	Department of Gastroenterology, University of Ulsan College of Medicine, Asan Medical Center, Seoul, Korea
128	Ji-Beom Kim	Korea	Pregnancies and neonatal outcomes in patients with inflammatory bowel diseases: A single center experience in Korea	Department of Gastroenterology, University of Ulsan College of Medicine, Asan Medical Center
8	Qingfan Yang	China	Contribution of MDR1 gene polymorphisms on IBD predisposition and response to glucocorticoids in IBD in Chinese population	Department of Gastroenterology, the First Affiliated Hospital, Sun Yat-sen University, Guangzhou, P.R. China
193	Sung-Jin Park	Korea	Terminal restriction fragment length polymorphism analysis of the diversity of fecal microbiota in patients with ulcerative colitis	Department of Internal Medicine, Chung-Ang University College of Medicine
17	Meng-Tzu Weng	Taiwan	SHANK3, a novel Crohn's disease-associated gene, regulates ZO-1 expression via protein kinase C epsilon	Departments of Internal Medicine, College of Medicine, National Taiwan University, Taipei, Taiwan
136	Sung Noh Hong	Korea	Meta-analysis for the risk of preoperative anti-TNF- $\alpha$ treatment on early postoperative complications in patients with inflammatory bowel diseases	Department of Medicine, Samsung Medical Center, Sungkyunkwan University School of Medicine
176	AMARENDER PURI	INDIA	Prolonged clinical remission with induction dose of Infliximab in severe ulcerative colitis	Dept of Gastroenterology, GB Pant Hospital, Delhi University
38	Yu Hwa Lee	Korea	Alterations in Composition and Diversity of the Intestinal Microbiota in Patients with Crohn's Disease	Department of Internal Medicine, Hanyang University Guri Hospital, Guri, South Korea
123	Ho-Su Lee	Korea	Cytomegalovirus colitis increased the risk of venous thromboembolism in patients with inflammatory bowel disease	Department of Gastroenterology, University of Ulsan College of Medicine, Asan Medical Center, Seoul, Korea
159	Dong-Hoon Yang	Korea	TNFSF15 is an Independent Predictor for the Clinical Course of Crohn's Disease in Koreans	Department of Gastroenterology, University of Ulsan College of Medicine, Asan Medical Center, Seoul, Korea
31	Jaeyoung Chun	Korea	Ursolic Acid Inhibits NF- $\kappa$ B Signaling in Intestinal Epithelial Cells and Ameliorates Acute Murine Colitis	Department of Internal Medicine and Liver Research Institute, Seoul National University College of Medicine, Seoul, Korea
84	Maria Carla Tablante	Philippines	Characteristics of Inflammatory Bowel Disease according to age of diagnosis in the Philippines	Section of Gastroenterology, University of Santo Tomas Hospital, Manila, Philippines
23	Alvin Brian Velasco, MD	Philippines	Inflammatory Bowel Disease in the Philippines	University of Santo Tomas Hospital
